PATIENT RESOURCES

Patient Conversation Guide

This patient tool can be completed prior to the visit with the health care provider to guide a meaningful conversation about bowel habits and constipation symptoms.

» https://www.theacpa.org/uploads/ACPA-Opioid_Constipation_Chart-V4.pdf

Patient Education Handout

This leaflet provides patients with approaches to mitigating opioid-induced constipation and includes a list of questions about constipation for patients to ask their doctors or clinics.

» https://www.acponline.org/system/files/documents/patients_families/products/health_tips/oic_en.pdf

OTHER RESOURCES

Consensus recommendations on initiating prescription therapies for opioid-induced constipation.

CLINICAL ASSESSMENT TOOLS

Bowel Function Index (BFI)

The BFI provides a numerical score for the prior 7 days based on ease of defecation, feeling of incomplete evacuation, and personal judgment of constipation.

» <http://www.exchangecme.com/resourcePDF/chronicpain/BowelFunctionIndex.pdf>

Bristol Stool Form Scale

This visual scale is used to help patients characterize their stool. It classifies the most commonly passed stool forms into 7 types.
